2023.4.28 KU20 V1.2.1.STD
[Supporting Software]
Coex VMP V1.2.0 or later
[New Features]
1. Support the All-In-One Controller working mode. The layer can be scaled flexibly and fill the entire screen.
2. Support temperature scale switching between Celsius and Fahrenheit, adapting to different usage habits.
3. Support SNMP and Art-Net protocols, allowing for secondary development and system integration.
[Improvements]
1. Improved the preset switching effect from direct switching to fading to black and then fading from black to the new preset. This avoids strong visual stimulation caused by sudden screen brightening and offers a more comfortable visual experience.
[Notes]
None

2022.11.25   KU20 V1.0.1
[Supporting Software]
Coex VMP V1.0.0 or later
[New Features]
None
[Improvements]
1. Improved the preset switching effect from direct switching to fade to black, avoiding screen blurring or flashing and offering a more comfortable visual experience.
[Bug Fixes]
1. Fixed the voltage monitoring and LCD display problems.
